the depths are unexplored  
no one has been there before  
and if they have they cannot see  
why it matters to you and me

over the mountains of Mars  
across the cosmic sea  
through the deep beyond the stars  
all we want is to be free

the depths are unexplored  
no one has been there before  
knowledge there is hard to find  
you know that it will blow your mind

the alk, with love, 2020
